A vegetable garden on the balcony

Sample Speaker

About this talk

Small pots, little sun and a few minutes a day are enough for a good harvest.

Plan

- Choosing the pots and the soil
- Sowing and watering
- Harvest and storage

Pots and soil

Pots

- Terracotta keeps the roots cool in summer

Pots

- Terracotta keeps the roots cool in summer
- Plastic is light and holds the water longer

Soil

- Universal soil mixed with some sand

Soil

- Universal soil mixed with some sand
- A layer of gravel at the bottom for drainage

Soil

- Universal soil mixed with some sand
- A layer of gravel at the bottom for drainage
- Compost once a month from spring to autumn

Light

Tomatoes and peppers want six hours of direct sun; lettuce and herbs grow in half shade.

Sowing and watering

Sowing calendar

- Basil and tomatoes in April, indoors

Sowing calendar

- Basil and tomatoes in April, indoors
- Lettuce from March to September, every three weeks

Watering

Water early in the morning, at the foot of the plant, never on the leaves.

Harvest

Harvest

Pick often: many plants produce more when the fruits are taken young.
